DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim in step "E" recites the limitation "selected first aid treating items" in line

1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over The Logoed CD "The Medi CD Kit" (Non Patent Literature www.thelogoedcd.com) in view of Worrell et al (US 6,497,443).

Imagine Music discloses the invention substantially as claimed including providing an empty compact disc (CD) holder that is in similar size and shape to a commercially sized CD and providing a first aid kit inside an empty CD holder. What Imagine Music does not disclose is the placement of the kit in a CD storage site in an

Art Unit: 3721

automobile. However, Worrell teaches that it is old and well known in the art of CD storage to provide a storage unit that can accommodate multiple CD cases of a commercially available size, and is located between the driver and passenger, that consists of walls, and can be used as an armrest for the purpose of storing plural compact disc cases in a readily accessible place (see Fig. 1 and C3, L51-55). Further more, in regard to the claimed subject matter of step "E". The examiner takes Official Notice that it is common sense in the art of packaging to place articles into a package in such a manner that it occupies less space than the package itself for the purpose of ensuring that the package can properly close after the contents are placed inside. Therefore, it would have been obvious to one having ordinary skill in the art to have modified the invention of Geocaching.com with the storage means as taught by Worrell for the purpose of storing plural compact disc cases.

Response to Arguments

5. Applicant's arguments filed 2/26/04 have been fully considered but they are not persuasive.

Applicant argues that the teaching of Worrell does not disclose the process of emptying a CD case of its contents and placing the reconstituted CD case, with the first aid items in the storage case. While the examiner does agree with the statement, the examiner also contends that there is sufficient motivation to combine the teaching of Worrell into the primary reference of the "Medi CD Kit". The "Medi CD Kit" clearly anticipates the applicant's invention by providing a CD jewel case that has "the world's

Art Unit: 3721

smallest first aid kit" inside. The teaching of Worrell was chosen by the examiner to show applicant that is well known to have a CD storage medium in a convenient position inside an automobile for the purpose of accessing CD cases in a relatively safe manner. While the teaching of Worrell does not explicitly teach the use of a first aid kit, the examiner asserts that the Worrell could hold a CD case with a first aid kit contained inside, since the case is dimensioned to the same size of commercially available CD's.

Therefore, for the reasons indicated above, the rejection is deemed proper.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
